

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## PREFACE

---

The form of this list is due to the circumstances of its origin. It was drawn up primarily for the use of the Library Committee in distributing book funds and revising the subscription list, and as the records forming its basis were scattered as well as incomplete, work on the list was constantly delayed by the necessity for previous overhauling of the fundamental records; an undertaking by its very nature both tedious and difficult. Since both phases of the work were carried on under high pressure it is probable that the list contains some errors. The librarians will be grateful for notice of any such errors which may be detected, as it is intended that this list shall be one of the bases of the projected new edition of the Coöperative List of Periodical Literature in Libraries of Central California, now eleven years old and, owing to its age and to the disaster of 1906, of little practical use in its present form.

In the compilation of this list much assistance was deriyed from the following publications:

A List of Serials in Public Libraries of Chicago and Evanston. Chicago 1901.

The John Crerar Library Supplement to the List of Serials in Public Libraries of Chicago and Evanston. Ed. 2. Chicago 1906.

List of Serials in the University of Illinois Library. Urbana-Champaign 1911.

A List of Serials in the Principal Libraries of Philadelphia and its Vicinity. Phila. 1908; and Supplement, 1910.

A List of Periodicals, Newspapers, Transactions, and Other Serial Publications Currently Received in the Principal Libraries of Boston and Vicinity. Boston 1897.

Catalogue of the Periodicals and Other Serial Publications . . . in the Library of the U. S. Department of Agriculture. Washington 1901.

The work was carried on under the supervision of Frank M. Bumstead, in charge of the Periodical department, by Misses Alice I. Lyser and Edna L. Goss, to whom acknowledgment is due for faithful and conscientious performance.

JOSEPH C. ROWELL, Librarian.

HAROLD L. LEUPP, Associate Librarian.

BERKELEY, June 9, 1913.

## EXPLANATIONS AND ABBREVIATIONS

---

This list is theoretically complete to May 1, 1913, for the serial publications in the General Library of the University of California and in the departmental libraries situated in Berkeley; it does not include the Bancroft Library. The term "Serial" is interpreted to cover newspapers, periodicals, annuals, and the reports and serial publications of societies, corporations, institutions and governmental bodies, except those of the United States government and catalogues and administrative reports of colleges and universities other than the University of California.

Entries are in accordance with the A. L. A. Catalog Rules, 1908. The following are the most important points for users of the list to note:

1. A serial not issued by a society or public office is entered under first word (articles excepted) of latest form of title.

2. A periodical with distinctive title, issued by a society or institution, is entered under title.

3. Annuals, bulletins, journals, memoirs, proceedings and transactions are entered under latest form of name of publishing body.

4. Learned societies, academies and institutions, other than English, beginning with adjectives expressing royal privilege, as Kaiserlich, Königlich, Reale, etc., are entered under first word following, the adjective being abbreviated and disregarded in alphabetizing.

5. Institutions are entered under name of place where situated, except that

- (a) American and British institutions with distinctive names are entered under first word of name.

- (b) College and university libraries, museums, observatories, etc., are entered under name of college or university. Colleges and universities having geographical designation are entered under country, state or city of title.

- (c) National or state institutions incorporating name of country or state in their titles are entered under country or state. U. S. agricultural experiment stations are entered under state.

- (d) Newspapers are entered under city in which published.

Government offices as subheadings under country, state or city are printed in italics, and placed before other entries for same place. The word "State" appearing as first word in titles of state offices or institutions is disregarded in alphabetizing, except when necessary to differentiate between state and city of same name.

A dash - between volume numbers or dates signifies "From and including the former to and including the latter." A plus sign + following entry indicates that set is complete from last volume or date given, and is currently received.

Parallels || indicate cessation of publication with preceding date. Brackets {} enclosing volume numbers or dates indicate that set is imperfect between such numbers or dates.

Bold-face letters and symbols at right of page signify that the preceding title is a gift ( $\Delta$ ), exchange (X), or subscription; and in regard to subscriptions, indicate the department or departments (or the subject not corresponding to a department but recognized in the distribution of book funds) in the interest of which the subscription is maintained. The distribution of subscriptions is based upon the original requests, checked by the replies to a questionnaire instituted in October, 1911. All subscriptions are paid for from a special appropriation except those marked \*, which are classed as "Continuations" and paid for from departmental book allotments, and those marked †, which are purely departmental subscriptions, paid for from departmental funds and shelved at the departments. Current files only are marked, except that category X includes all entries, current or not, in which more than half the volumes have been received by exchange. When a current serial has changed category, the symbol indicates its present status.

## SYMBOLS AND ABBREVIATIONS

A	Anatomy	ME	Mechanics
AG	Agriculture	MI	Mining
AH	Archaeology	O	Oriental Languages
AN	Anthropology	P	Pathology and Bacteriology
AR	Architecture	PL	Palaeontology
